WEEK-7

Peer-graded Assignment: Module 11 Assignment

Problem-4

For the big order database table in Table 3, you should list FDs with the column *OrdNo* as the determinant. For each FD, you should identify at least one pair of sample rows that falsify it or indicate that no falsification example exists for the FD. Remember that it takes two rows to falsify an FD in which the LHS is the same in both rows, but the RHS is different in both rows.

<u>OrdNo</u>	<u>ItemNo</u>	QtyOrd	CustNo	CustBal	CustDisc	ItemPrice	OrdDate
01	11	10	C1	100	0.10	10	1/15/2014
01	12	10	C1	100	0.10	20	1/15/2014
02	13	5	C2	200	0.05	30	1/16/2014
02	14	10	C2	200	0.05	40	1/16/2014
03	11	10	C1	100	0.10	10	1/17/2014

Table 3

Solution 4:

OrdNo → ItemNo (1,2), (3,4)

OrdNo → QtyOrd (3,4)

 $\mathsf{OrdNo} \to \mathsf{CustNo} \; \textbf{None}$

OrdNo → CustBal None

OrdNo → CustDisc None

OrdNo → ItemPrice (1,2), (3,4)

OrdNo → OrdDate None
