Sl No	Relevant Course	Evaluation Components	0	2	4	6	8	10
		Y19 - SDP-1 EVALUATION RUBRIC						
1	SE	Use cases/User Stories listing						
2		Gitlab/Github usage with scrum boards						
3		Daily Standups with Sprint Meetings						
4		Testing procedures adopted for whitebox testing						
5		Testing procedures adopted for blackbox testing						
6	DBMS	Logical Modelling of data						
7		Physical Modelling of data						
8		Data Querying						
9		Usage of indeces and triggers						
10		Testing of the Normalised tables with SQL Queries						
11		Use of MongoDB against MySQL for Unstructured data						
12	AI	Inclusion of Intelligence driven user stories in the project						
13		Algorithmic implementation of the intelligence component in the design phase						
14		Testing of the algorithm with Unit test cases						
15	MP-1	Inclusion of use cases related to optmization						
16		Algorithmic implementation of the optmization component in the design phase						
17		Testing of the algorithm with Unit test cases						
18	MSWD	Creation of Angular Forms, Use of Materials & Services to design Front End						
19		Rich User Interface (Front end) including form validations						
20		Component based Angular Programming						
21		Creation of webserver using Node.js						
22		Session Management						
23		Angular and MongoDB with Node.js interaction						
24		CRUD Operations on Database as Back End						
25		Final output as per the client requirements
